

Engineered Building Systems to Offer Blygold Coating

Engineered Building Systems can now provide Blygold services, including:

- **HVAC Coil Coating (RTPF) and Fin Tube Coating using PoluAl XT:** an aluminum pigmented polyurethane coating developed for the protection of air-cooled heat exchangers
- **Microchannel Coating using PoluAl MC:** a flexible coating & flexible application process
- **Tube Sheet & Waterbox Cladding using Blygold Cerafill & Cerasec:** a VOC free, ceramic reinforced two-component epoxy coating
- **Cabinet & Casing Coating using Blygold Casing Guard or Clearcoat**
- **Blygold Clear Coating:** a transparent coating system that enhances existing OEM coating properties with long resistance to UV exposure
- **Blygold Casing Guard:** for the most severe exposure conditions. Best for oil platforms, coastal environments or wastewater plants
- **Refurbishment and Rejuvenation:** Expert renovation and refurbishment of air handling units. Significantly lower cost than replacement.

These services are offered from our Wilkes-Barre, PA office, allowing for quicker lead times, reduced transit time and lower overall costs.

Please contact Engineered Building Systems at 570-208-4822 for more information.
